AME VERTICAL AND ROACH CONVEYORS ENTER DISTRIBUTION AGREEMENT

TROY, MI. July 5th, 2017 - AME VERTICAL, solutions based material handling systems integrator, and ROACH CONVEYORS, an Arkansas based designer and manufacturer of conveyors for warehousing and distribution, formally agreed to a commercial partnership in the Southeastern United States effective immediately. AME Vertical will be focused on small to medium sized conveyor projects to complement their offering within e-Commerce distribution and the automotive industry. AME has long seen a void with clients that want exceptional service and long-term relationships, but don't have huge capital and program business requirements.

"In this business, as an integration partner for best of breed technologies, we understand the importance to stay close to our customers in building repeat business. And that's always been our strong suit; building relationships by exceeding expectations. No matter what the project size." "This opportunity to represent a best in class organization like ROACH is a very exciting milestone in the growth of AME" said David Easterbrook, President of AME Vertical.

ROACH, located in Trumann, AR, has been in business for over 60 years as a privately held family business. ROACH manufactures their full line of conveyors, lifts and transfers in their manufacturing plant also in Trumann, AR. ROACH also provides a quick ship program that includes over 100 models of conveyor available within 24 hours.
